About Me

A highly motivated and enthusiastic Computer Science Engineer with a strong academic background who is excited about the possibilities of technology and its impact on society. Seeking a challenging position in a reputed organization where I can learn new skills, expand my knowledge, and leverage my learnings.

Projects

Brain Blitz   Jan'23-June'23
- A fun and challenging game that tests memory skills! An interactive and engaging experience with colorful picture cards and intuitive gameplay.

Rainfall Prediction System   Dec'23-April'23
- By leveraging historical weather data and ML algorithms, this project offers accurate and timely predictions of rainfall patterns through web application.

Captcha Decoder   Aug'22-Dec'22
- It provides an efficient and reliable solution for decoding and solving Captchas through ML algorithms and tools.

Toll Plaza Management System   Jan'22-May'22
- provides a comprehensive solution for toll operators, including staff and customer management equipment, backend systems, and toll plaza infrastructure design.

Certifications

Cisco Packet Tracer   October 2021
- Cisco Certification

Fundamentals of Data Analytics   December 2022
- SSC and NASSCOM Certification

Solution Architecture Virtual Experience program by AWS   June 2023
- Certification include basic knowledge about various AWS Architecture.

Data Visualization: Empowering Business with Effective Insights   June 2023
- TATA Certification

Google cloud Certificate by Google   July 2023
- This certificate validates my knowledge and skills in using (GCP) services.

Achievements -   Journal & Chapter

2022	**"Use of AI in Public Administration"** Published in **"International Journal of Electronic Devices and Networking."**
2023	**"Revolutionizing Government Operations: The Impact of Artificial Intelligence in Public Administration "** Under Press in **Wiley Publication**.
